-Merchant-Traveler.

He got his Customer. The following story is told of an enter prising New York jobber, the events hav ing taken place some years ago: The merchant in question, having heard of the arrival of a country trader who was known to be a large purchaser and of uncustomer. He accordingly sent out one of his drummers, of whom he had quite a The Pall Mall Gazette's correspondents number, adapted to every taste and disposition. The one sent, however, returned least, and yet they asked for only a small without success. No. 2 was dispatched, with no better success, and again No. 3,

back without their man. The merchant now determined to go himself, and finding that brandy and water and free tickets to the theatre were of no avail, for the country trader did not take one or go to the other, he was reduced to the necessity of employing a ruse, which, as the sequel shows, was simple as well as effectual. On taking his departure, after a pleasant interview, the merchant took care to commit the "mistake" of taking the trader's hat instead of his own. Next morning, as was expected, the merchant received a prompt visit at his store from the country trader, who called to look up the hat which he supposed had been hurriedly exchanged. This was what the merchant wanted, and through this means sold a good bill of goods and secured a regular customer .- Dry Goods

spend it to great advantage and much better than the run of people. So we see that the perplexed millionaire really gets no help in deciding what he shall do with his \$500,000. He finds that the sum, great though it may be as an individual fortune, becomes paltry in com-parison with what is needed or desired by his fellow men. It is only as a drop in the bucket, and if he gives it away to a!leviate human misery its effect will be

hardly appreciable. That is, society must work out its own improvement, and individual liberality in the way of money will give it little help to that end. The true public benefactors are those who teach men what they need

That is a good story which the Rev. Dr. Rust, Secretary of the Freedman's Aid Society, tells to the Northern Conferences, before which he presents the claims of his society. A young Negro in the South had been converted, and at sels. once wanted to preach. His elders thought he was not fitted for the important work, but he well-nigh staggered them by relating a vision, in which he had plainly seen the letters, "G. P. C.," which could mean only, "Go, preach Christ." A white-haired negro preacher slowly arose and told the ambitious young brother that, while he had no doubt seen the letters in a vision, he had failed in the interpretation. They probably meant, "Go pick cotton," or "Go, plow corn." This settled the matter.

But they didn't; and Baum, growing sulkier as he grew wetter, wished himself back in his snug little apple orchard at the foot of the "Giant Mountains," where he used to be in bed every night before the village clock tolled ten, after a good supper of brown bread and cabbage. In the summer of 1845 it pleased God take to himself my beloved wife, whom had taken with me from the lower part of South Carolina, and located, with our three children, in the parsonage of Wadesboro Circuit, North Carolina, at that time included in the South Carolina Conference. The writer of these lines was the preacher in charge of the circuit. The following year I was stationed in the city of Charleston, and brought the two younger children to the home of their grandparents, then living in the lower part of Sumter District. There they were tenderly cared for and nursed. By some strange and unexplained accident the elder one, a little girl just approaching the completion of her third year, got out of the yard in company with a little negro girl some four months younger than herself, and disappeared in the surrounding pine forest. Within half an hour after being last seen Instantly, Baum was himself again. At the first sign of a stranger approaching his then searched for, but could not be found. dered out of sight and hearing in that short time has never been ascertained. The search now began in good earnest. Fields and gardens and neighboring swamps were searched diligently, but all in vain. Night came on, and the whole community, white and colored, were thoroughly aroused. Fires were built in

the little lost ones would come to them.

In that they were mistaken.

The search was continued the following day and night with no better results. The same on Saturday, and about sunset the body of the little Negro was found on the border of a cypress pond, about three miles from home. It was evident that she had just died, as her body was still warm. The searchers were now sure that they would soon find little Susan (the white child), "Smoke!" echoed the sentry. "Why, and going closely together, they searched the bushes and neighboring pond of water. so that they felt sure of finding her, dead or alive. But they did not. It was a long and dreary night, and many anxious hearts beat high in the expectation of soon accomplishing their sad mission. On the following morning (Sunday, Feb. 14, and her birthday, I think, she being just three years old), a young man on horseback penetrating the thicket growing around the pond, saw a little object lying near the foot of a pine tree, and on closer inspection discovered that it was the person of little Sue-but not dead. She turned toward him as he dismounted and hastened to her side, and addressing him, said: "I want to go to grandpa's-I want some tea." He took her up in his arms, and with a shout of exultation, called in the searchers, and in a body they moved toward the house of the grandfather. It was a new illustration of the oft-repeated words: "The dead is alive." A new illustration of the watchful care of Divine Providence was seen in the fact that as they bore her in triumph to the house of her grandparents, they met a kind-hearted and intelligent physician, who instructed them how to manage the case. He went himself and did not leave her until he thought her out of danger. She was and food (in small quantities) were all she needed, and both were at hand. She survived a fast of seventy-two hours, as there was nothing for her to eat, excepting, possibly, some wild berries, which, in all pro-
